TetraFauna ReptoHabitat

The TetraFauna ReptoHabitat Kits feature components designed to work together so set-up and maintenance are easy.

All feature innovative screen tops and built-in cord routing. The screen is padlock compatible for easy locking. All kits include filtration, basking platform, food, and water care.

TetraNature Freshwater Gel Foods

- * Soft gel aquarium fish food recreates natural feeding conditions
- * Nutritious moist gel mix allows aquarium fish to forage for food
- * Supplement aquarium nutrition with food even shy and finicky fish love

Treat your fish to a dining experience that encourages natural feeding behaviors. TetraNature Freshwater Gel Foods are soft-textured, gel foods designed to simulate the way fish eat in nature. Nutritious ingredients PLUS tasty "mix-ins" attract even shy and finicky fish to feed. Offer TetraNature Freshwater Gel Foods in conjunction with your primary diet for diverse and balanced nutrition.

TetraNature Freshwater Gel Foods offer a smart, convenient way to supplement aquarium fish nutrition. Sophisticated packaging process seals in freshness and eliminates the need for refrigeration. Convenient, single-serve packs allow easy dispensing. Each formula contains NO artificial colors or preservatives. 16 pouches per 1.4 oz (40 gram) pack.

TetraNature Algae Enhanced Gel Mix contains a blend of fish and algae proteins, ideal for fish such as live bearers, algae grazing cichlids and other veggie-loving tropical and coldwater fish. A great choice for omnivorous and herbivorous aquarium fish that benefit from a diet strong in vegetable matter.

TetraNature Gel Mix with Bloodworms contains a blend of high-protein fish meal, whole bloodworms, and shrimp. Highly-attractive ingredients including shrimp and bloodworms make this scientifically formulated food particularly important for finicky or shy fish. Great for aquarium omnivores and carnivores.

TetraNature Gel Mix with Brine Shrimp contains a protein blend of fish meal, whole brine shrimp and Cyclop-eeze®, the arctic crustacean high in natural pigment astaxanthene. Ideal color-enhancing fish food for all freshwater omnivores and carnivores.

TetraColor Cichlid Sticks

Supplement to your cichlid's primary diet, these floating sticks promote the vibrant yellows and reds of blue acaras, butterflies, dwarf rainbows and firemouths. These bright red sticks are well accepted by medium to large cichlids. Blended with patented ProCare for optimal health.
